SLIDE®

SLIDE, azienda produttrice di arredi di design per indoor e outdoor, festeggia un anno pieno di novità e traguardi. Primo tra tutti l'apertura di un monomarca nel cuore di Milano, in Foro Buonaparte; uno spazio di 300 metri quadrati che raccoglie in Scenari le varie collezioni di prodotti, in un ambiente metropolitano di grande effetto scenico disegnato dall'architetto Roberto Paoli. E poi i festeggiamenti per i dieci anni di Low Lita, un prodotto iconico che si mantiene come best seller, e viene proposto in un'edizione speciale che si avvale di un procedimento produttivo unico nel suo genere, frutto di lunga ricerca sul materiale utilizzato, il polietilene, che rivela un risultato estetico di grande impatto. Senza tralasciare le fiere internazionali, le collaborazioni con designer di fama mondiale e giovani talenti, le nuove proposte di arredo, di colori, ma anche di materiali. Tutto rigorosamente Made in Italy.

Piccoli e grandi tasselli che costruiscono la storia di una giovane realtà che esplora, sperimenta e innova costantemente, garantendo sempre un'eccellenza estetica e funzionale dei propri prodotti. Dal 2002 la guida della famiglia Colonna Romano proietta con passione l'azienda milanese nel futuro dell'arredo d'interni ed esterni, senza dimenticare il fare giocoso che ha caratterizzato l'azienda in questi ultimi 15 anni.

SLIDE, a manufacturer of indoor and outdoor design furniture, celebrates a year full of innovations and achievements. First of all, the opening of a showroom in the heart of Milan, in Foro Buonaparte: a 300sqm space that shows the various collections by different Scenarios, in a spectacular metropolitan setting designed by the architect Roberto Paoli.

Second, the 10th anniversary celebrations of Low Lita, an iconic product that has become a bestseller. Low Lita will be produced in a special edition, thanks to a unique production process that gives great aesthetic effects, as a result of an innovative research on polyethylene.

Third, international fairs, collaborations with worldwide known designers and young talents, new furniture, colours and materials. Everything is strictly Made in Italy.

These are all small and big bricks that build the history of a young reality that constantly explores, experiments and innovates. Finally, Slide guarantees both an aesthetic and a functional excellence in products.

Since 2002, the Colonna Romano family's guide has been pushing with passion the Milan-based company into the future of interior and exterior furniture design, while maintaining alive the playful character of the company.

Karim Rashid is a leading figure in the field of design and is largely credited for helping to bring exceptional, affordable design to the masses. His perspective and clients are global and he considers himself a cultural shaper doing projects ranging from products, interiors, fashion, furniture, lighting, to art and music. Karim's commercial success has been mirrored by critical acclaim; his works are in the permanent collections of 14 museums worldwide, including MoMA and the San Francisco Museum of Modern Art.

Karim Rashid

French citizen born in Austria, Marc Sadler has lived and worked in France, North America, Asia and Italy. One of the first graduates in "esthétique industrielle" at the ENSAD in Paris with a thesis on plastics, he was a pioneer in experimentation on the different materials and contamination between technologies, which have become distinctive aspects of his work. Today, thanks to his eclecticism, he is a consultant for a wide range of industry companies. Awarded four times with the Compasso d'Oro, his work has won many international design awards over the years.

Marc Sadler

Marcel Wanders grew up in Boxtel, the Netherlands. His fame started with the iconic Knotted Chair, which he produced for Droog Design in 1996. He is now ubiquitous, designing for the biggest European contemporary design manufacturers as B&B Italia, Bisazza, Poliform, Moroso, Flos, Boffi, Cappellini, Droog Design and Moooi of which he is also art director and co-owner. Additionally, Marcel Wanders works on architectural and interior design projects and recently turned his attention to consumer home appliances.

Marcel Wanders

Stefano Giovannoni was born in La Spezia in 1954 and graduated from the Faculty of Architecture in Florence in 1978. He has been a professor at Domus Academy in Milan, at the "Università del Progetto" in Reggio Emilia and at the "Università di Architettura" in Genoa. He has worked with important companies such as Alessi, Fiat, Flos, Lavazza, Magis, Seiko, Siemens, Veneta Cucine, Telecom, Edra, Bisazza. He has designed hugely successful products.

Stefano Giovannoni

An architect trained at the Turin Polytechnic (1973), in the 1970s and 1980s she worked in the Alchimia group. From 1985 to 1988 she made a radical breakthrough: she became the consultant for the construction of image and product in the Philippines, Indonesia, Malaysia and Thailand for UNIDO and the World Bank. Over her long career, she has worked with prestigious furniture companies and she has been the artistic director of Gervasoni since 1998.

Paola Navone

Alessandro Mendini is an Italian architect, born in Milan. He has been editor-in-chief of the magazines Casabella, Modo and Domus. Alessandro Mendini makes design objects, furniture, interiors, paintings, installations and architecture. In 1979 and 1981 he received the Compasso d'Oro for design. His projects are found in museums and private collections around the world. Alessandro Mendini's theoretic and written work, along with his design work, finds its origin at the crossroads between art, design and architecture.

Alessandro Mendini

Giulio Cappellini is an architect, designer, art director from Milan. After the graduation in Architecture, he started working as a designer and art director both in the family business and in other internationally famous design brands. Every project he develops is his own reinterpretation and interpretation of contemporary design. Thanks to his amazing vision of design concept, Time magazine awards Cappellini among the ten best trendsetters of fashion and design.

Giulio Cappellini

Roberto Paoli is architect and designer. His design is the result of the combination of functionality and technology. Roberto Paoli find his own professional dimension in Milan developing projects from product to interior design and architecture. He collaborates with companies in the furnishing and lighting and he actively participates to various exhibitions and design culture events.

The **Bright** Scenario

With the Bright Scenario, the astonishment is all in the brightness of its actors. Light is the absolute protagonist and the great classics of bright furniture with colourful lamps and abstract shapes. Every character can play different roles: thanks to the Bright Scenario, everyone can have a design object to create his own plot, and give a touch of magic for houses, event locations and contract project.

Plume
Elios

design Giò Colonna Romano
hanging lamp

"Light, essential and thin: Elios and Plume were born from the continuous research of material: the fiberglass process creates a family of hanging lamps that becomes richer thanks to the contrast between the external side of the lamp, in different colours, and the brightness of the inner side".
Giò Colonna Romano

Mineral

Juxt

Mineral

design Slide Studio
hanging lamp

Its particular marbled polyethylene finishing, gives to a humble material such as polyethylene the status of a precious material such as marble. Mineral is ideal to create a light spot, it can be used as a single chandelier, or to create a composition with different dimensions, so that this composition can be transformed into a large luminous fulcrum in indoor contract spaces.

Tech info 217 - p. 232

Ico

Ico

design studioPang
hanging lamp

Ico is the reinterpretation of the large, classic and very bright kitchen lamp, which is recalled in its shape. Its playful and irreverent style matches perfectly with polyethylene: this young, fun and minimal hanging lamp was born from this cooperation.

Ø 50 H 23 cm
Tech info 216 - p. 232

Mesh

design BBMDS
hanging lamp

The generative process of Mesh begins from a single unit, unique and made in polyethylene: it could be replicated, to spread out the space. Every single unit consists of three crossed elements, which make the product modular, to create variable schemes for every kind of indoor spaces.

The **Icon** Scenario

The Icon Scenario is the constant research of renovation and new ideas, thanks to the collaborations with designers of international reputation. The whole scenario refers to actors who like to experiment with shapes and colours, and it is ideal for both indoor and outdoor locations, for both domestic spaces and contract. The Icon Scenario is always a step forward, thanks to designers' creative vision.

Rap Collection

design Karim Rashid
armchair, sofa

Ideal to create unforgettable indoor or outdoor corners, the Rap collection is a magnet with its minimal but unusual design. The shape of the backrest embraces whoever sits on. The Rap collection gives comfort, relax and a sense of protection that allow you to enjoy a lovely moment.

Rap Chair, armchair, W 115 D 78 H 75 cm, tech info 046 - p. 220

Rap Chair

Low Lita, Low Lita Love, Low Lita Table

Low Lita Collection

design Paola Navone
low chair, low sofa, chaise-longue, coffee table

"This collection is dedicated to the pleasure of relax both outdoor and indoor, it looks informal, fun and nice. Low Lita tells stories of different worlds which "mix-up" with joy. It can remind of a seat with an African style of an exotic country. Unexpectedly, it becomes something different but also contemporary, thanks to its material and the technique used to realize it".
Paola Navone

Low Lita, low chair, W 78 D 80 H 70 cm, tech info 039 - p. 219
Low Lita Love, low sofa, W 118 D 80 H 70 cm, tech info 040 - p. 219

Low Lita Lounge, Low Lita Table

Kami Collection

design Marc Sadler
low chair, armchair, sofa, coffee table

"The name of the collection takes its inspiration from the ancient Japanese art of folding papers. The shapes traced by lines and bisectors characterizes the armchair and the sofa, as well as the seats with the related small table. These lines and bisectors cross each other following a scheme similar to the one of the traditional Origami, with cuts and folds different from the modern technique that contemplates only a few folds. A synthesis between abstraction and line essentiality, which complete each other with simplicity and elegance in the proportions".
Marc Sadler

Chubby, Chubby Low, Chubby Side Table

Chubby Collection

design Marcel Wanders
lounge armchair, footrest, coffee table

"Chubby was projected as a plastic reinterpretation of the Crochet Chair, an armchair composed of crocheted fiber which has been hardened with epoxy and designed in a limited edition of 20 in 2006. The open structure and lightness of the chair provided a nice contrast. When I decided to propose it in polyethylene I designed a footrest and a coffee table in order to create a small collection of products".
Marcel Wanders

Chubby, lounge armchair, W 130 D 120 H 56 cm, tech info 013 - p. 217

Dream Line, Dream Line Feet-Up (both with PVC tissue)

Dream Line
Dream Line Feet-Up

design Marco Acerbis
low chair, footrest

"We get so used to some objects around us that we do not see them anymore. The benches of the historical parks in Milan are examples of that, where two cast-iron abutments on the ground shape the supports for the wooden slats on which we sit down. So, why not revise all this for new outdoor seats with the rigid polyurethane abutments that can stretch the seating part in an elegant and soft way thanks to their tie-rods? Therefore, it appears a collection that is comfortable and easy to locate in a transversal way, with a timeless and vintage but always contemporary style".
Marco Acerbis

Dream Line, low chair, W 63 D 74 H 72 cm, tech info 020 - p. 218
Dream Line Feet-Up, footrest, W 63 D 61 H 37 cm, tech info 021 - p. 218

Dream Line (with synthetic leather)

Sled

Exofa

Sled

design Karim Rashid
armchair

"Sled was inspired by a form I have been pursuing for many years – a bucket seat mould over tubular steel legs. The plastic/foam almost drapes over the support highlighting the inherent softness of a cushioned flexible polymer".
Karim Rashid

Twist

Tic Tac, Gear Low Table

Twist

design Prospero Rasulo
rocking low chair

W 110 D 53 H 71 cm
Tech info 056 - p. 220

Tic Tac

design Marco Acerbis
chaise-longue

"Tic Tac derives from the idea to re-interpret the iconic models of the design but in an ironic way, by using the coloured polyethylene. So, a classic for 100 years such as the chaise-longue is de-emphasized and revised both in the shape and the use. Like the mechanism of a watch that works on the slots and the moves to settle in the most suitable position. Differently from the classics, it can be used alone as well without the support but simply putting it directly on the floor, then support turns and becomes a small table while going on with its metamorphosis".
Marco Acerbis

The **Soft** Scenario

Softness and comfort are the protagonists of the Soft Scenario in which we introduce a new material: polyurethane. This new material suggested us new seats and product shapes, as a prompter. Polyurethane is a multipurpose actor: it is resistant, waterproof and fireproof, it does not deflect and it is easy to clean. The Soft Scenario proposes more comfortable seats and soft items can talk with other luminous and polyethylene products of our collection.

Gelée Grand

design Roberto Paoli
soft pouf

Gelée Grand is the biggest item of Gelée collection, and it shares the same wish to be tested for its softness and comfort: an object that integrates beauty, entertainment and technology in a perfect mix.

The **Design of Love** Scenario

As a star on the stage, but also out of the stage, the Design of Love Scenario steals the spotlight. With its Baroque style, pop and ironic at the same time, all these products instil a strong energy due to both the impact colours and the playful shapes that are true magnets of attention and curiosity. The collection suits for a lot of interpretations and different atmospheres, giving a look both to private houses and contract.

Queen of Love
Little Prince of Love

design Moro, Pigatti
armchair, pouf

"The Design of Love Collection is a box of ideas and emotions that arise from the simplicity of a unique material: the recyclable linear polyethylene. The collection is completely Made in Italy and has brought a touch of freshness and an innovative approach to the design world by re-interpreting the Baroque furniture in a Pop way. All the products infuse a strong ironic energy both for the impact colours and the playful shapes that are true magnets of attention and curiosity. Thanks to the transversal character, the collection suits for a lot of interpretations and different atmospheres, giving a new look both to privates houses and indoor spaces of important hotels, showrooms and restaurants".

Mirror of Love (size XL)

The **Slide** showroom

The new Slide showroom is a metropolitan space in the heart of Milan: it is about 300sqm – divided in two floors - and it is located in one of the most famous points of the city, Foro Buonaparte 57, close to Sforzesco Castle. The Art Director of Slide, Roberto Paoli, tended to enhance the structure by highlighting its historicity: he brought the already present elements back to their ancient splendour, adding architectural and exhibition iron elements, to realize a space of great contemporaneity.

design Moro, Pigatti

material: polyethylene

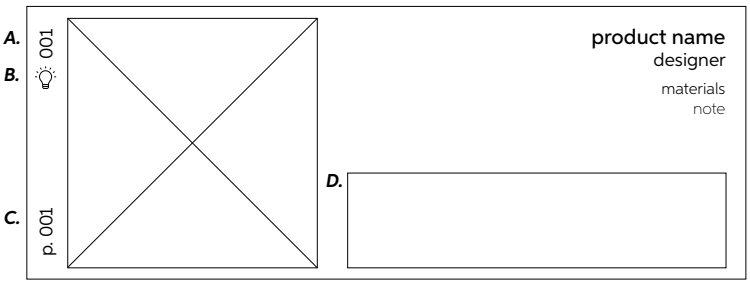
How to read the technical boards:

A. *board number*
B. *luminous version available*
C. *catalogue reference page*
D. *technical drawings (measurements in cm)*



Colours and finishes

standard polyethylene colours

FT milky white

FH jet black

FG elephant grey

FE chocolate brown

FV malva green

FL powder blue

FJ argil grey

FP dove grey

FR lime green

FB saffron yellow

FC pumpkin orange

FD flame red

FU sweet fuchsia

lighting polyethylene colours

LA light white

LB light yellow

LC light orange

LR light green

LL light blue

LD light red

LS light pink

LU light fuchsia

lacquered colours

QA glossy MF matt absolute white

QH glossy MI matt glamour black

QG glossy MK matt vanity grey

Q2 glossy M3 matt charming ivory

QD glossy MN matt supreme red

QO glossy MZ matt metallic gold

QM glossy MY matt metallic silver

Q4 glossy M5 matt metallic copper

Note: other lacquered colours and two-coloured lacquering are available on request at an extra charge.

soft polyurethane colours

PA soft white

PH soft black

PG soft anthracite

PI soft grey

PE soft chocolate

PP soft argil

PB soft yellow

PD soft red

Materials

The SLIDE production is entirely MADE IN ITALY and is produced at the plant in Buccinasco (Milan) - Italy. All SLIDE products are 100% recyclable, realised by the means of a zero emission production cycle in compliance with the environmental sustainability principles. Below the characteristics of the main materials used for the manufacture of SLIDE products.

Polyethylene
Material: Linear low-density polyethylene – LLDPE
Production process: rotational moulding
Resistant to extreme temperatures: -60°C to +80°C
(Luminous version: if equipped with fluorescent bulb -20°C to +60°C / with LED system 0°C to +50°C)
UV resistant (except lighting colours)
High tensile strength
100% recyclable

Polyurethane
Material: Polyurethane – PU
Production process: injection moulding
High durability
Very good thermal resistance
100% recyclable

Maintenance and cleaning

Keep the products away from excessive heat sources.
To prevent dust and dirt from sticking to the plastic surfaces, periodically clean the products.
Avoid using ethanol or any liquids containing acetone, trichloroethylene or ammonia (solvents in general).

Polyethylene: clean the product with a damp cloth and neutral liquid soap diluted in water.
It is recommended the use of SLIDE's "Clean-Up" cleaner or a degreaser. In case of persistent stains, use a scrub eraser (melamine foam - Scotch-Brite Easy Eraser or similar) or a hot water pressure washer. Spray the cleaning product on the surface and rub with a damp cloth. Rinse abundantly with water, preferably with hot water high-pressure washer.

Polyurethane: clean the products with a soft cloth and neutral liquid soap diluted in water, especially if the surface comes into contact with highly coloured substances (such as coffee, tea, oil, etc.). Only use neutral detergents in water solution.

	CLEAN-UP cleaner	Detergent with high-cleaning power recommended to clean SLIDE products (standard and luminous versions)

For lacquered version: periodically clean with a polish cleaner, gently rubbing with soft cloth/cotton wool. For metal parts use specific detergents, avoiding the use of abrasive cleaners.

For further information on the maintenance and cleaning the SLIDE products consult the technical sheets available to download on the website www.slidedesign.it.

Warranty

SLIDE products are guaranteed against all manufacturing faults, granted that the items are appropriately used, for twenty-four (24) months from the date of purchase upon presentation of the invoice. LEDs are guaranteed for twelve (12) months from the date of purchase upon presentation of the invoice.

Warranty doesn't include parts that are subject to wear and tear due to usage, batteries when provided, wiring and electrical parts that do not have manufacturing faults. SLIDE declines any liability to damages caused to things or persons by an illegitimate use of the product.

Candy Light - Wireless rgb led module

Candy Light 5W power module
brightness: 150 lm
Candy Light 10W power module
brightness: 300 lm

Rechargeable battery RGB LED module
with IR remote control
IP44 - for indoor & outdoor use

specifications - 10 fixed colours, 4 effects.
compatibility - SLIDE products with I3 or E3 base.
accessories - Power supply & IR remote control.
battery runtime - Up to 20 hours.
charging time - 12-14 hours.
life expectancy - 500 charging cycles.

Certifications and declarations of conformity

The company SLIDE srl, Via Lazio, 14 - 20090 Buccinasco (MI) - Italy
declares under its own responsability that:

The indoor lamps with I1 and I3 wiring base versions (IP20 protection degree)
comply with the following standards:
EN 60598-1 (2006)
EN 60598-2-4 (1998)
EN 55015 (2014)
The outdoor lamps with E1 and E3 wiring base versions (IP55 protection degree)
comply with the following standards:
EN 60598-1 (2006)
EN 60598-2-7 (1998)
EN 55015 (2014)
For this reason, this declaration satisfies the essential requirements of the following directives:
2014/35/EU - Low Voltage Directive
2014/30/EU - Electromagnetic Compatibility
